Microphones

OC818 Studio Set		
The OC818 is a premium-grade studio mic featuring a multi-pattern, dual output design. At the heart of the microphone is a handmade CKR12 ceramic capsule. This custom edge-terminated capsule is hand-built in Vienna, delivering exceptional sonic clarity and an extended frequency range. Dual outputs allow you to record each diaphragm separately. Two analogue filters and two attenuation pads. The PolarPilot app allows wireless control over the analogue signal in real time, with the ability to save and recall settings. PolarDesigner plugin provides more control with 1-5 crossover bands. The Studio Set includes OC818 mic, spider mount, pop shield, mini XLR cable and mic clip.

Microphone Accessories

OCR8 Bluetooth Remote		
The OCR8 is a bluetooth dongle that can be fitted to the rear of an OC818. This unique feature allows for a previously unheard of 255 discrete polar patterns between figure-of-eight, through all of the cardioid versions and into omnidirectional. The free control software, PolarPilot, will be available for iOS and Android. This all occurs in the analogue domain and there is no processing or conversion of the mic's signal to digital.
