Amplifiers

A860

The Bluesound Professional A860 is a high quality 8-channel power amplifier for use in commercial installations. This 2U amplifier provides 50W x 8 at 8, 60W x 8 at 4 or 120W at 8 per pair of channels in bridged mode. A standby mode can be triggered remotely or automatically for low power consumption when not in use. A global input can be assigned to multiple outputs and global and local output facilitate multiple amplifier installations. Thermostatically controlled fans ensure trouble-free operation in a wide range of conditions.	
8 Channel Power Amp	BSP0001	RRP: £1,429.00

Streamers

B100S

The Bluesound Professional B100S is a 1/3 rack space network music player designed specifically for use in commercial installations. This player is based on the established BluOS platform and is capable of playing and distributing content from local network storage as well as from a large number of streaming services, including some specifically designed for commercial use, such as SoundMachine, Custom Channels, QSIC, SiriusXM Music for Business and Tunify.	
1 Zone Network Music Player - 1/3 1U	BSP0002	RRP: £649.00

B400S

The Bluesound Professional B400S is a 4-zone network music player designed specifically for use in commercial installations. This 1U player is based on the established BluOS platform and is capable of playing and distributing content from local storage as well as from a large number of streaming services, including some specifically designed for commercial use, such as SoundMachine, Custom Channels, QSIC, SiriusXM Music for Business and Tunify. These sources can be played to one or more of the four available stereo zones with the B400S effectively acting as four independent players with the capability of completely separate content and control, or grouping into user-definable groups of whatever size required with different zones within the BS400S and/or any other connected Bluesound Professional players on the network.	
4 Zone Network Music Player - 1U	BSP0005	RRP: £1,499.00

Streaming Amplifiers

B160S

The Bluesound Professional B160S networked streaming stereo amplifier is a complete solution for a commercial music installation. The B160S combines a high-quality stereo amplifier with a BluOS enabled network music player. The B160S's HybridDigital™ amplifier section provides 2 x 60W of power into 8 – plenty for most small/medium spaces and thermostatic fan cooling provides for reliable operation in commercial environments. The amplifier technology is highly energy efficient and also has a standby mode consuming only 6W of power.	
1 Zone Network Stereo Amp	BSP0003	RRP: £1,010.00

B170S

The Bluesound Professional B170S networked streaming stereo amplifier is a complete solution for a commercial music installation. The B170S combines a high-quality stereo low impedance and constant voltage amplifier with a BluOS enabled network music player. The B170S's amplifier section provides 2 x 80W of power into 4/8 or 2 x 100W at 70V or 1 x 100W at 100V. This provides plenty of power for most small/medium spaces and thermostatic fan cooling provides for reliable operation in commercial environments. The amplifier technology is highly energy efficient and also has a standby mode consuming only 6W of power. The addition of constant voltage outputs allows for long chains of small speakers to be powered with variable power tapping at each speaker giving control of local volume.	
1 Zone Network Stereo Amp With 70/100V Output	BSP0004	RRP: £1,069.00

PoE & Passive Speakers

BSP1000

The Bluesound Professional BSP1000 is a network active loudspeaker with integrated streaming capability designed specifically for use in either indoor or outdoor commercial installations.	
POE Network Streaming Speaker - 6.5" (Black)	BSP0006	RRP: £810.00
POE Network Streaming Speaker - 6.5" (White)	BSP0007	RRP: £810.00

BSP500

The Bluesound Professional BSP500 is a network active loudspeaker with integrated streaming capability designed specifically for use in either indoor or outdoor commercial installations. This unit is powered by Power over Ethernet(PoE) allowing a one-wire connection to the speaker for both power and audio. The player in the BSP500 is based on the established BluOS platform and is capable of playing and distributing content from local network storage as well as from a large number of streaming services, including some specifically designed for commercial use, such as SoundMachine, Custom Channels, QSIC, SiriusXM Music for Business, Tunify and radio stations.

PoE Network Streaming Speaker - 5.25" (Black)	BSP0012	RRP: £689.00
PoE Network Streaming Speaker - 5.25" (White)	BSP0013	RRP: £689.00

BSP125

The Bluesound Professional BSP125 is a network active loudspeaker with integrated streaming capability designed specifically for use in commercial installations. The player in the BSP125 is based on the established BluOS platform and is capable of playing and distributing content from local network storage as well as from a large number of streaming services, including some specifically designed for commercial use, such as SoundMachine. As well as stand-alone use, it is possible to use a pair of BSP125 speakers in stereo configuration. Use of the BSP125 in a larger BluOS system is also possible, allowing for grouping into user-definable groups of whatever size is required with other BSP125 units and/or any other connected Bluesound Professional players on the network in an installation.

Compact Network Streaming Speaker (Black)	BSP0008	RRP: £435.00
Compact Network Streaming Speaker ((White)	BSP0009	RRP: £435.00

BSP200

The Bluesound Professional BSP200 is a PoE+ powered network active loudspeaker with integrated streaming capability designed specifically for use in commercial installations. The player in the BSP200 is based on the established BluOS platform and is capable of playing and distributing content from local network storage as well as from a large number of streaming services, including some specifically designed for commercial use, such as SoundMachine, Custom Channels, QSIC, SiriusXM Music for Business and Tunify. As well as stand-alone use, it is possible to use a pair of BSP200 speakers in stereo configuration. Use of the BSP200 in a larger BluOS system is also possible, allowing for grouping into user-definable groups of whatever size is required with other BSP200 units and/or any other connected Bluesound Professional players on the network in an installation.

PoE Compact Network Streaming Speaker (Black)	BSP0010	RRP: £435.00
PoE Compact Network Streaming Speaker (White)	BSP0011	RRP: £435.00

BSW150

The Bluesound Professional BSW150 is a network active subwoofer with streaming capability designed specifically for use in commercial installations. The BSW150 is so discrete you'll forget where you put it. Designed to fit neatly in boardrooms or small commercial establishments, this compact subwoofer digs deeper and plays louder than its bulkier rivals, and can be easily positioned featuring several clever installation options, the BSW150 will fit perfectly into your location of choice.

Network Powered Subwoofer (Black)	BSP0014	RRP: £939.00
Network Powered Subwoofer (White)	BSP0015	RRP: £939.00

Accessories

CP100

The Bluesound Professional CP100 is a low profile wall-mount control panel for all Bluesound Professional players. It features sleek design with a glass control panel with illuminated touch sensitive controls. It is possible to recall presets, pause music/mute and adjust volume in the zone that the panel is controlling. The CP100 is designed to fit flush to the wall or mounted in a large variety of international back-boxes for ease of installation. The control panel controls illuminate as needed, and the control can be locked to protect against unintended or unauthorised use.

Wall-Mount Keypad Controller	BSP0016	RRP: £275.00

RM160

The Bluesound Professional RM160 is a rackmount system allowing up to 6 x B160S network streaming stereo amplifiers to be mounted in a 3U space in a 19" rack. The B160 modules slot in from the front and are secured by a front panel screw, allowing for swift replacement when required. B160S units are supported front and back and cabling is tidied with a rear tray.

Rack Mount Accessory for B160S	BSP0019	RRP: £225.00

RM100

The Bluesound Professional RM100 is a rackmount system allowing up to 3 x B100S network streaming players to be mounted in a 1U space in a 19" rack. The B100S modules slot in from the front and are secured by a rear panel screw, allowing for swift replacement when required. B100S units are supported with a full chassis.

Rack Mount Accessory for B100S	BSP0020	RRP: £125.00

WM125

Easily mount the BSP125 on your wall with the WM125 Wall Mount and position the speaker to your liking. Precision engineered with high-grade materials to perfectly match the BSP125, the WM125 uses a tilt-and-swivel design that allows you to place and lock the speaker at the optimal angle for enhanced sound quality. Even when mounted, cable management with the WM125 is simple with free and easy access to any connection you need.	
Wall Mount Bracket for BSP125 (Black)	BSP0021	RRP: £60.00
Wall Mount Bracket for BSP125 (White)	BSP0022	RRP: £60.00

Network Accessories

CS1 BPR

The CS1 Endpoint Network Streamer supports the most popular network streaming and casting protocols, including Bluetooth, Apple AirPlay 2 and Google Chromecast, so users can stream directly from devices like smartphones, tablets and computers. The CS1 can play high-resolution audio, up to 24-bit/192kHz, with MQA pass-through support for both digital outputs, enabling full decoding and rendering by a compatible external DAC for playing Master Quality Authenticated music.	
Endpoint Streamer	BSP0017	RRP: £340.00

PRO HUB

The Bluesound Professional HUB is a versatile network accessory that allows the connection of both analog and digital audio devices to a BluOS ecosystem for networked streaming. Users can use the HUB to play audio sources like TVs and business music players in single or multiple zones of an installation without being limited by wires and physical proximity.	
Network Input Accessory	BSP0018	RRP: £359.00
