

DCi Series

The DriveCore Install series is a complete line of highly efficient, high performance installation amplifiers based on the proprietary DriveCore technology. DCi Series amplifiers are designed, engineered and manufactured to the industry's highest quality standards, and provide system integrators with the advanced features and flexibility required for challenging installed sound applications. Power points of 300W, 600W or 1250W in 2-/4-/8-channel configurations, all in a 2U form factor. Direct Drive Constant Voltage means no need for a step-up transformer at the output to drive 70 or 100v systems and produces higher audio quality much more efficiently. Individual channels in the same amplifier can be configured as hi/low-Z as required. Bridgeable, even in 100V mode. Remote on/off interface. Network models have monitoring and control via Audio Architect, BLU-Link, DSP and programmable GPIOs. ND models have AVB connectivity.
